6.	CORE COMPONENTS UN/CEFACT REGISTRY VERSION USED	

1. Objective section

The objective of this document is to identify the complete set of class diagrams to be used to transform the business requirements shown in the BRS approved by the FMG on 15 July 2008 into the target technology solutions expressed in this document.

2. Definition of terms section

All terms are defined in the accompanying BRS.

3. Target technology solution section

The target technology is XML schema.

4. Information payload to be implemented section

4.1 Conceptual data model section

4.1.1 Class diagram

The lodging house travel product class in the Lodging House Information Message is shown below in Figure 1.

Class diagram - Lodging House Travel Product Class in the Lodging **House Information Message**

And the class diagram of the lodging house travel product is shown in Figure 2.

Figure 2 **Class diagram - Lodging House Travel Product**

4.2 Canonical data model section

The Canonical data model section is the same as in the Conceptual data model section.

5. Business information entity reference section

All the business information entities developed, including BBIEs, ABIEs, and ASBIEs, are shown in the file linked to this document in the form of the TBG17 submission template.
